

**TAG HEUER AQUARACER**

**PROFESSIONAL 200 SOLARGRAPH**

## **CRAFTED FOR THE GREATEST OUTDOORS**

TAG Heuer is again using the sun, a limitless energy source, to create a timepiece whose movement integrates an innovative solar module, named Solargraph.

The new Aquaracer Professional 200 Solargraph is specifically designed to be the perfect companion for outdoors adventures.

# KEY FEATURES

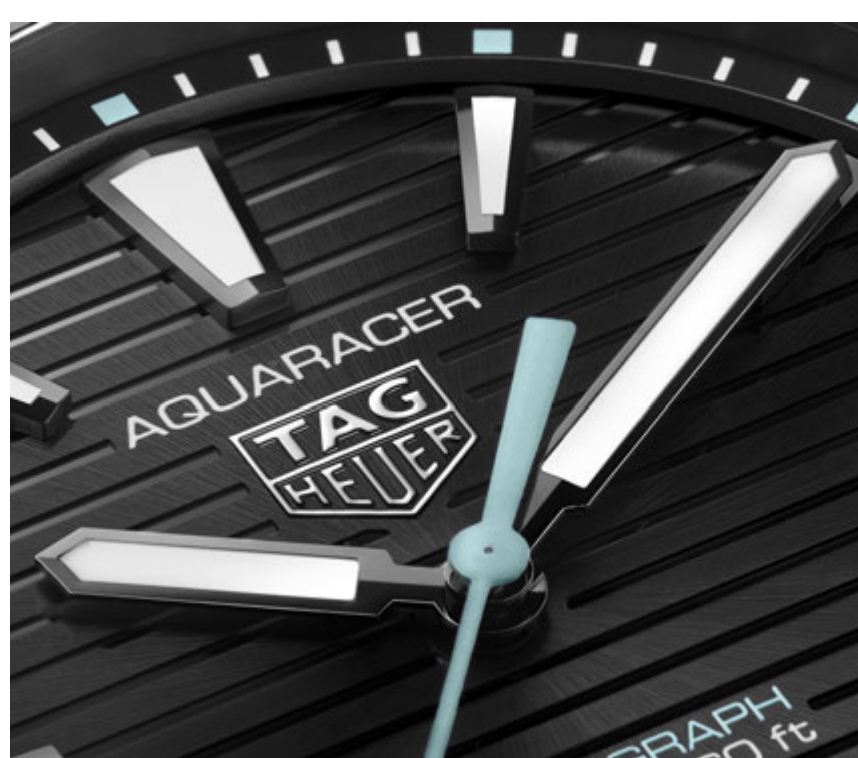

---

## DRIVEN BY THE SUN

---

TAG Heuer's solar movement provides a host of guaranteed benefits. With the Solargraph movement, no need to change the battery of the watch, it recharges with the sun or artificial light. The movement needs only two minutes in full sunlight to keep the watch running for a whole day.

## DIAL

---

The particular dial of the timepiece is partially transparent, allowing the movement to be charged by sunrays. A beautiful nod to the outdoor philosophy of the Aquaracer.

## CASEBACK

---

The sunray brushed case back made from titanium grade 2 which features the cardinal points make this perfectly resistant for every adventure outside.

## BRACELET

---

The finishing touch is a titanium grade 2 folding clasp with an adjustment link extension, as well as the TAG Heuer shield.

## SUPER-LUMINOVA®

---

Indexes, hour, minute and central hands are applied with Super-Luminova®.
