

**TAG HEUER AQUARACER**

PROFESSIONAL 300

GMT

## READY FOR ANY-TIME ADVENTURES

Travel the world with the TAG Heuer Aquaracer which, thanks to a robust construction and Calibre 7 GMT is the perfect companion for any exploit. This technical tool watch has a fresh and sporty style that looks the part, whatever the time zone.

# KEY FEATURES

## TOOLWATCH

---

The TAG Heuer Aquaracer Professional 300 GMT is the ultimate go-anywhere watch, a powerful and yet hugely versatile design created to cross time zones and dive and surf all over the world.

## DIAL

---

The characterful, imposing dial, still with its signature horizontal lines, is a deep midnight blue, offset by white lume-filled hands and hour markers. The rhodium-plated central sweep seconds hand has a yellow lacquer tip, and a luminous insert designed to inform divers that the watch is running during a dive.

## CASEBACK

---

As with the core, TAG Heuer Aquaracer Professional 300, the case back of this watch is cast in steel and decorated with a repeating hexagon motif and the famous scaphander diving suit that also first appeared on the TAG Heuer Aquaracer case in 2004.

## BRACELET

---

The new TAG Heuer Aquaracer Professional 300 GMT comes on either a stainless steel metal bracelet or on a deep midnight blue rubber strap to match the dial and bezel. Both feature TAG Heuer's ergonomic fine adjustment system so that the watch can easily be tailored to fit over a wetsuit and back again.

## SUPER-LUMINOVA®

---

For extra clarity, the designers chose green Super-LumiNova® for the hour hand and hour markers, and blue Super-LumiNova® for the GMT minute hand.

To determine day from night, it's cast in two colors: half in a deep midnight blue to match the dial and represent the night-time hours and the daytime hours. The GMT hand, which makes a full tour of the dial once every 24 hours and is set via the crown, is finished in yellow lacquer and tipped with luminous material.
