

TAG HEUER AQUARACER

PROFESSIONAL 300

ORANGE DIVER

ORANGE DIVER, A RENEWED MYTH

This unmissable TAG Heuer Aquaracer is inspired by a historic model from 1979. As daring as it is robust, this steel-cased 43mm orange diver is ready to endure any conditions. The perfect companion for your adrenaline-fueled exploits.

KEY FEATURES

CASE

The Aquaracer Professional 300 Orange Diver owns the historical collection's six features. The watch offers a 12-sided uni-directional rotating bezel with a scratch-resistant black ceramic ring, shaped to offer the perfect grip, the crown is protected to avoid any accidental damage and the model is water-resistant to 300 meters.

DIAL

Orange is the color of safety on the seas; the bright tones provide maximum contrast against the blue of the water. A dial bound to stand out.

CASEBACK

To complete the Aquaracer Professional 300's look and feel, the designers returned to the famous scaphander diving suit that first appeared on the Aquaracer case back in 2004.

BRACELET

This new reference also integrates the Aquaracer Professional 300's sophisticated fine adjustment system on the strap that can extend or reduce the bracelet length by up to 1.5 cm. This enables any wearers to resize the bracelet so the watch can be worn on any occasion.

SUPER-LUMINOVA®

Legibility being one of the main features of the collection, the indexes and hands have been coated with white Super-LumiNova® to contrast with the color of the dial.
