CHRONOGRAPH TOURBILLON

COSC

## DARING BLUE

---

First perfected more than 200 years ago, a tourbillon is a continuously rotating cage that surrounds the escapement and is designed to counteract the influences of gravity on the accuracy of a mechanical movement. Even today, few watchmakers have mastered its complex form. TAG Heuer is among an elite group of manufacturers to have done so.

# KEY FEATURES

---

## CASE

---

Every element of the watch has been refined to reflect the mechanical beauty of the tourbillon. For example, thanks to the new TAG Heuer Carrera Chronograph Tourbillon's curved sapphire crystal and fluid form, the tourbillon's beauty can now be observed from a wider range of angles.

## DIAL

---

The deep azuré subdials are surrounded by high-contrast silver rings, making the chronograph read-outs as legible as possible. In the same way, the minutes scale running around the outside edge of the dial is punctuated by fiery orange detailing over each hour marker.

## MOVEMENT

---

The new watch is powered by TAG Heuer's in-house tourbillon movement, the TH20-09. The chronometer-certified automatic movement also has a chronograph function and is backed by a 65-hour power reserve. A sapphire case back showcases the TH20-09 movement.

## BRACELET

---

The watch comes on a blue calfskin leather strap.

## SUPER-LUMINOVA®

---

Rhodium-plated faceted hour and minute hands with green Super-LumiNova® for optimum readability.

## MOVEMENT

Calibre TH20-09 Automatic COSC

## SIZE

42 mm

## FUNCTIONS

Hours, minutes, chronograph,  
tourbillon

## WATER RESISTANCE

100 m

## DIAL

Blue circular brushed dial  
Blue flange with 60-second/minute  
scale

## BRACELET

Blue calfskin strap  
Polished steel folding clasp  
with double safety push  
buttons

## CASE

Polished steel case  
Domed sapphire crystal with double  
anti-reflective treatment  
Steel screw-down sapphire case back

The TH20-09 was created by TAG Heuer Movements Director Carole Forestier and the Swiss watchmaker's technical teams, so that it now delivers bidirectional winding, increased efficiency and accuracy, and a higher level of finishing. It comes with a five-year warranty.
