

TAG HEUER CONNECTED

CALIBRE E4 - 42MM
GOLF EDITION

NO DISTRACTIONS, JUST GOLF

Imagine starting a round of golf on your watch and never having to touch your watch during the game for it to keep track of your score. With the TAG Heuer Connected Calibre E4 Golf Edition, this is now possible. All the shots are tracked from the tee to the green, and, once there, putting is also tracked. Best of all, all tracked shots are allocated to a club.

KEY FEATURES

NO DISTRACTIONS, JUST GOLF

For golf enthusiasts, the TAG Heuer Connected watch takes the sport into a new era by providing all of the valuable information about each hole of the course without the wearer having to interact with the watch.

BRAND NEW INTERFACE

The TAG Heuer Connected Calibre E4 Golf Edition offers a redesigned interface to make it easier to control the watch's golf-related functions, including high-resolution 2D maps showing hazards and distances on more than 40,000 golf courses around the world. It allows the wearer to improve their game.

LIGHTER THAN EVER

The size of the case and the material used (black titanium) give this connected watch an undeniable advantage: it is the lightest TAG Heuer Connected ever produced. The double benefit of reduced size and weight will allow players to easily achieve a much sought-after objective: a perfectly balanced swing.

BRACELET

Building on its strong presence in the world of golf, TAG Heuer has evolved the codes of the TAG Heuer Connected Calibre E4 Golf Edition with the 42 mm model. The white rubber strap now features the TAG Heuer logo on the bracelet itself with a positive relief, while the bezel now displays the hole numbering from 1 to 18.

BLACK & WHITE

The 2023 TAG Heuer Connected Calibre E4 Golf Edition will be sold with an additional, easily interchangeable black leather strap with green stitching which will allow golfers to display a sporty elegance on all occasions.

Please note that some functionalities will be available later in 2023.
