Black DLC titanium grade 2 folding clasp with double safety push-buttons & integrated ball marker

1x additional black perforated rubber strap

Black DLC steel folding clasp with double safety pushbuttons

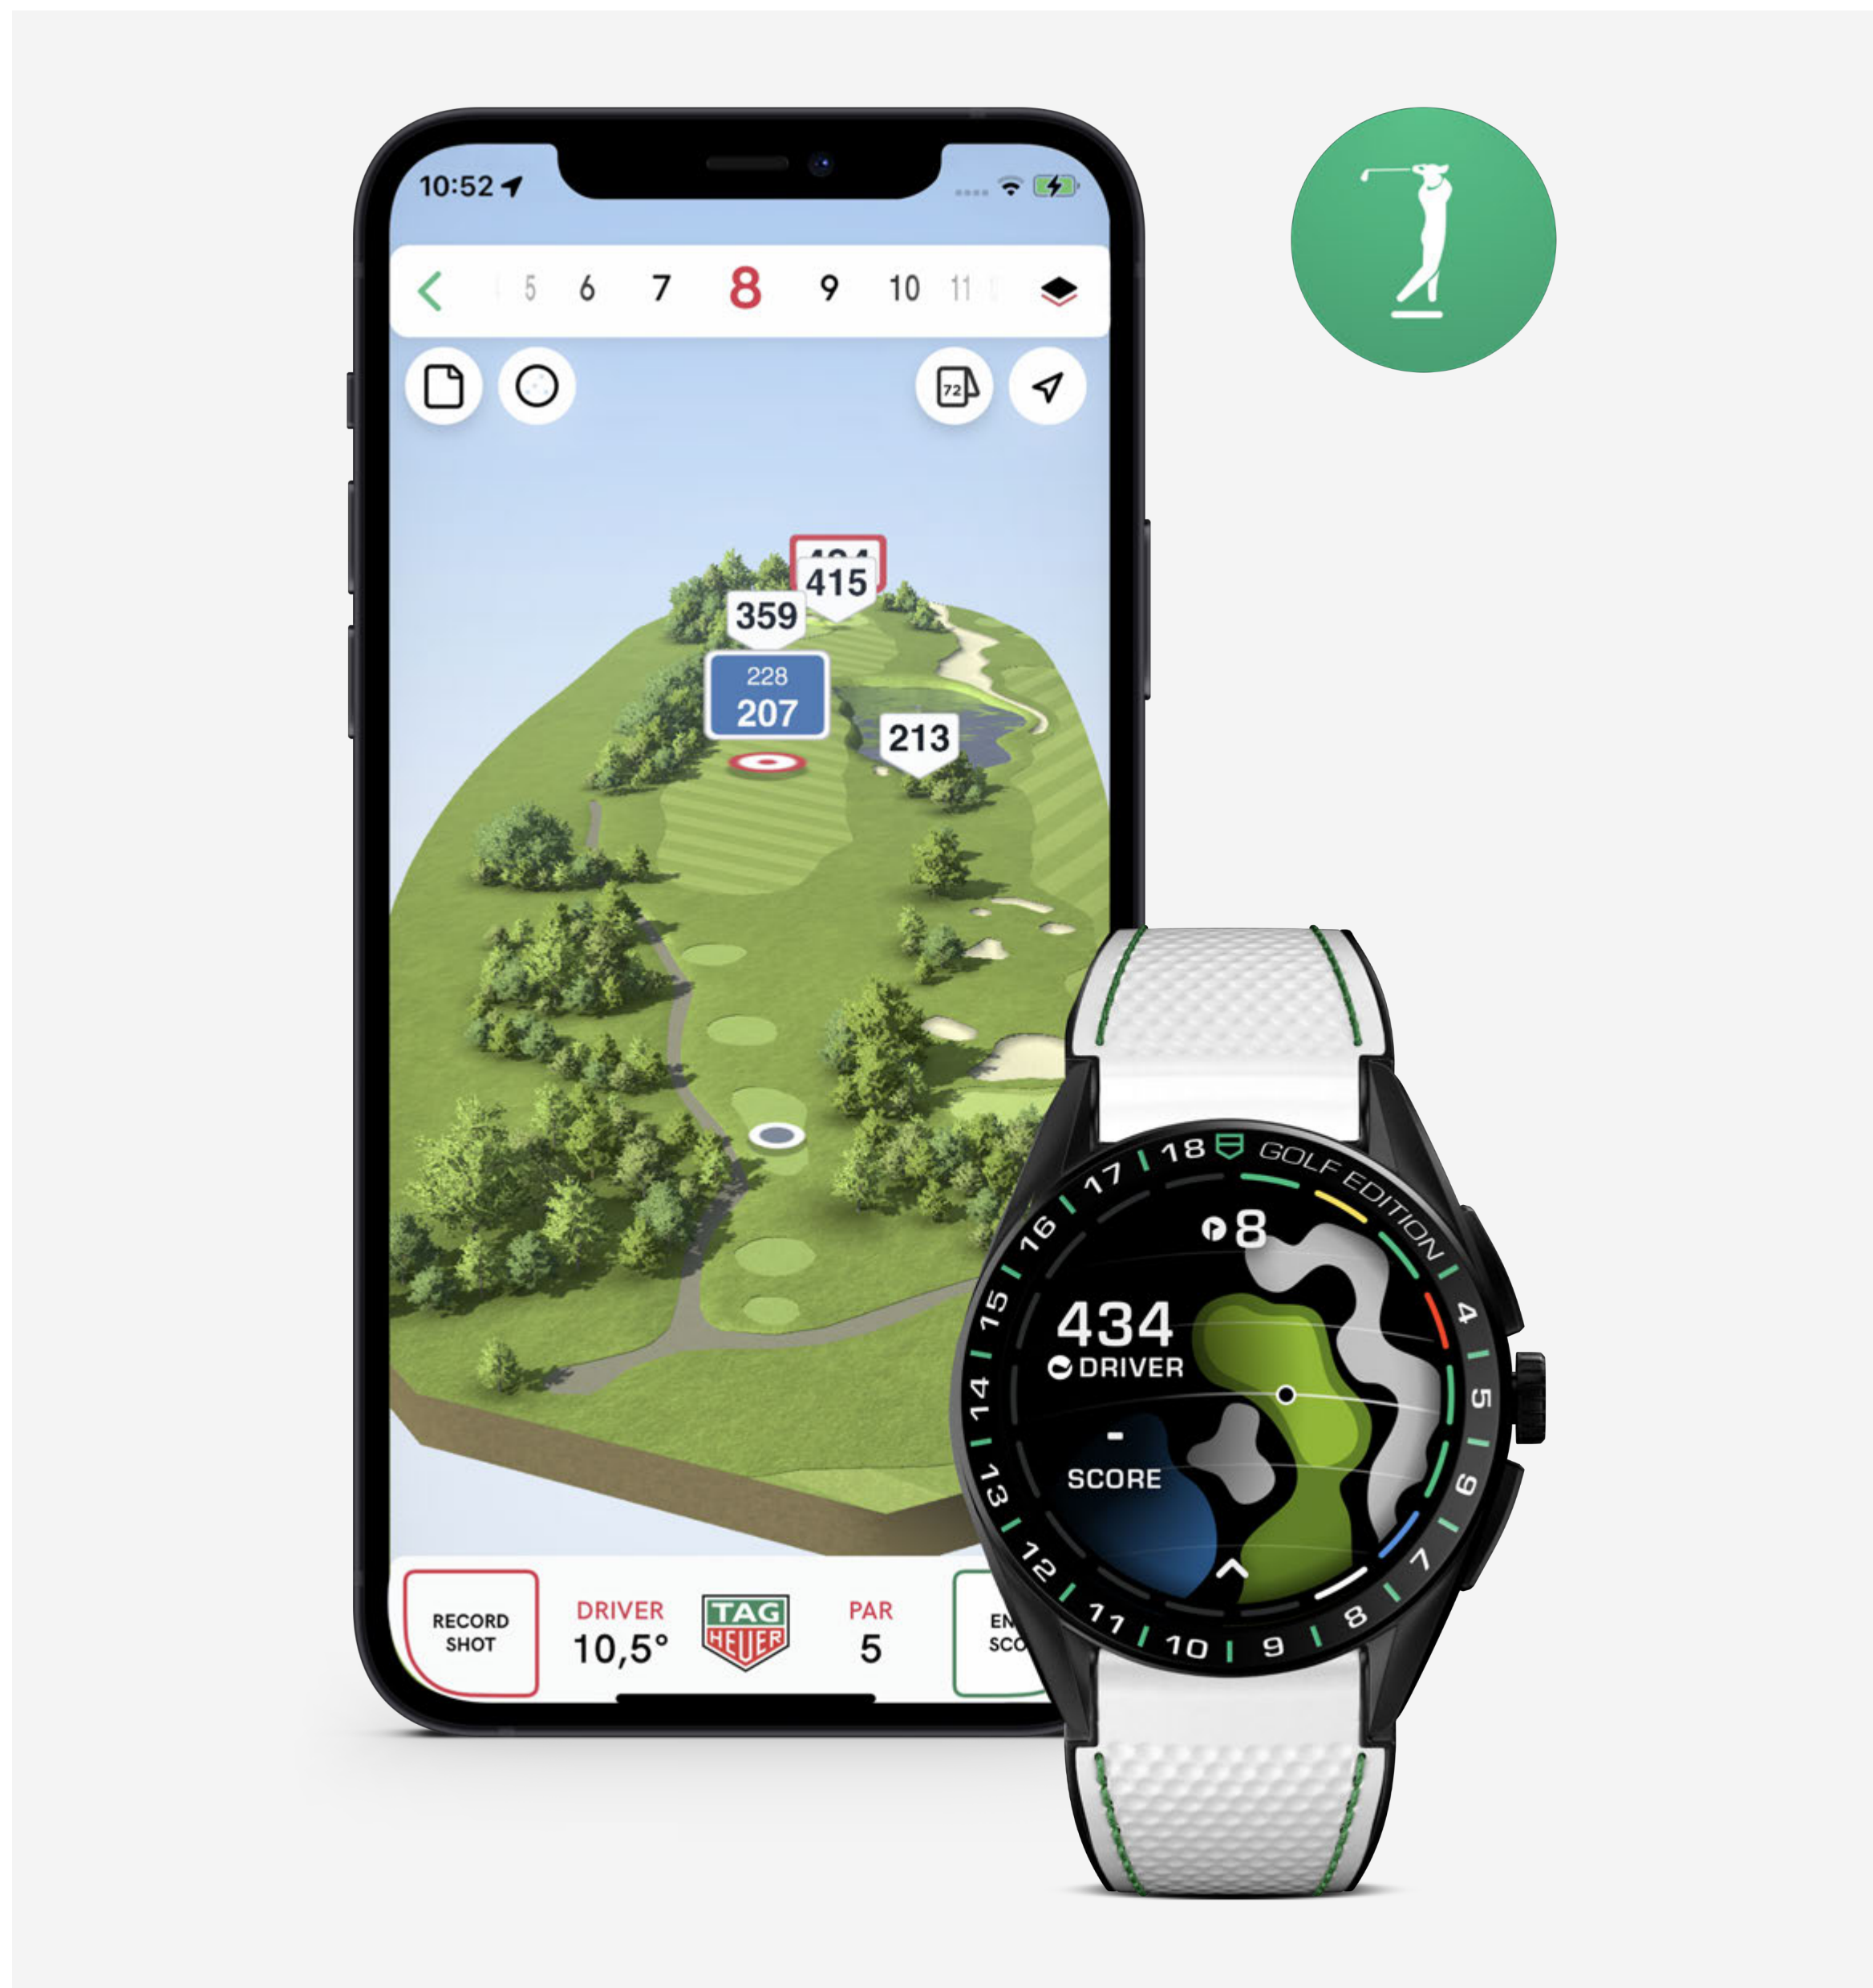

Tommy Fleetwood, professional golfer and TAG Heuer ambassador.

TAG HEUER GOLF APP

The TAG Heuer Connected Calibre E4 Golf Edition automatically detects swings to allow users to track their performance in the app without having to activate the function by hand. It concludes when the watch identifies the swing to hit a second stroke. It means golfers don't have to remember to track their drive, ensuring that the data is captured automatically.

The Driving Range feature offers a 'heat map' for every hole, which shows where shots landed on previous rounds. Over time, this allows golfers an overview of the strategies which work for them, helping them to pick the perfect club and the perfect route to each hole.

The automatic shot detection ensures users also have more information on the performance of each of their clubs, with the app automatically recording accuracy and distance for every tracked shot. This means that the app's trademark (and highly popular) club recommendations are more precise and information-packed than ever before.

Last but not least, we are launching a new exclusive way to show off your best shots. Using our 3D maps technology, the iOS app generates a beautiful video you can share with your friends.

The sporty white rubber strap with golf pattern has a ball marker integrated into the buckle. An additional black rubber strap, easily changed, offers extra versatility.
