

**TAG HEUER MONACO**

**CHRONOGRAPH NIGHT DRIVER**

**LIMITED EDITION**

For over 50 years, the Monaco chronograph has been the ultimate driver's watch. TAG Heuer introduces the Monaco Chronograph Night Driver, a limited edition that is a modern and innovative tribute to the racing spirit of this collection as well as its iconic Monaco Blue and captures the magic of driving a sports car on the open road at night.

# KEY FEATURES

## DESIGN

Inspired by the midnight blue, charcoal grey and matte black dials of the iconic vintage Monacos, this newest edition uses today's materials to build an instrument that enhances the experience and performance of those who take to the roads especially at night.

## DIAL

This TAG Heuer Monaco employs its unique "circle in the square" two-piece dial construction to provide instant readings for the driver. At night, the deep grey "circle" at the center of the dial provides strong contrast with the bright blue Super-LumiNova® finish of the hour, minute, and chronograph seconds hands, as well as bright dots that mark the hours.

## MOVEMENT

The Heuer 02 manufacture movement uses a traditional column wheel to reliably actuate the chronograph, while the movement's 80 hours power reserve will keep the TAG Heuer Monaco running over the course of a weekend of racing. The sapphire caseback displays the blue printing on the black oscillating mass, as well as the blue column wheel, extending this palette from the dial of the chronograph.

## BRACELET

The TAG Heuer Monaco Chronograph Night Driver Limited Edition incorporates a calfskin strap, with the alternating large and small perforations and bright white stitching along the edge of the strap also evoking Heuer racing chronographs of the 1960s and 70s.

## SUPER-LUMINOVA®

This fully luminescent dial is a true technical achievement for TAG Heuer and enables even better and more powerful legibility on the roads. By harnessing the capabilities of Super-LumiNova®, the timepiece is able to expand its luminosity across a broader surface area, allowing the dial to remain prominently visible in the dark for 3 hours after being fully charged by light.
