

**TAG HEUER MONZA**

**CALIBRE HEUER 02 COSC FLYBACK**

## **A MODERN REINTERPRETATION OF A TIMELESS CLASSIC**

A timepiece that expresses true boldness, confidence, and the love of speed. For the pro or amateur driver who is not afraid of taking risks, the TAG Heuer Monza Calibre Heuer 02 COSC Flyback is a collector's piece that expertly ties in decades of noble racing heritage with daring contemporary design and cutting-edge engineering.

# KEY FEATURES

---

## MADE FOR PRECISION

---

The notable advantage of a flyback function is the ability to reset the chronograph without stopping it, using the black DLC steel pushbuttons. Such a feature was only available on the TAG Heuer Autavia in the contemporary collection until now and allows for even faster and more accurate timekeeping.

## DIAL

---

Its striking black dial features a singular bi-compax layout with a translucent fumeée blue sapphire crystal chronograph counter at 3 and the permanent second at 6 o'clock. The unique skeletonized dial reveals the movement underneath and echoes the piece's mechanical roots.

## CASEBACK

---

Delivering high precision and high performance timekeeping the TAG Heuer Monza is powered by the in-house Calibre Heuer 02 Flyback, a chronograph movement with COSC certification. The 42mm case is made of ultra-lightweight and resistant carbon for the 1st time in the collection.

## BRACELET

---

The black textile strap with blue stitching contrast elegantly with the black dial and case.

## SUPER-LUMINOVA®

---

The blue lacquered indexes and black and white lacquered hours and minutes hands are applied with Super-LumiNova® for optimal legibility in low light.

## **A RACING MACHINE ON THE WRIST**

The watch offers three functions that are essential to a racing driver in action: a chronograph, a tachymeter scale which indicates average speed on a specific distance, as well as a pulsometer, which helps determine one's heart rate per minute.
